Summary

Senior Software Engineer with 4+ years of experience in Full Stack Development, AI Solutions, Identity & Access Management (IAM), Cloud Infrastructure, and Enterprise Software Architecture.

Experienced in PHP, Python, Java, Kotlin, Laravel, MERN Stack, AWS, OpenAI APIs, WSO2 Identity Server, and DevOps practices. Proven track record of delivering enterprise applications, AI-powered automation systems, Digital Gold platforms, IAM solutions, and cost-optimization initiatives resulting in annual savings exceeding ₹15 Lakhs.

Experience

➤ **Attica Gold Pvt Ltd / Senior Software Engineer - Full Stack PHP and Python Developer (Internal Software Management And R&D)**

Since February 2026 - Bengaluru, Karnataka. Onsite

- Lead software engineering teams, project delivery, code reviews, architecture planning, hiring, and stakeholder management.
- Architected Digital Gold Application ecosystem using Kotlin, MERN Stack, and secure backend services.
- Implemented SSO, MFA, and application security frameworks across enterprise applications.
- Developed AI-powered customer detection system using OpenCV and RTSP streams without additional hardware investment.
- Built Raspberry Pi-based IoT monitoring devices and branch surveillance solutions.
- Designed HRMS, Accounts Management, and Operations Dashboards used across multiple branches.
- Led backend development of Attica Mobile Application with Razorpay integration.
- Managed AWS infrastructure, deployment pipelines, and HashiCorp Vault integrations.
- Reduced annual operational costs by ₹15+ Lakhs through development of an in-house Attendance Management System replacing third-party software.

Technologies: PHP, Python, MySQL, Laravel, MERN Stack, Kotlin, Flutter, OpenCV, Raspberry Pi, AWS, HashiCorp Vault, Razorpay, Jitsi Meet, REST APIs, SSO, MFA

➤ **Attica Gold Pvt Ltd / Software Engineer - Full Stack PHP and Python Developer**

May 2025 - February 2026 Bengaluru, Karnataka. Onsite.

- Managed and enhanced internal software solutions, including Attendance Management, Billing Systems, IAM Solutions, and Call Center CRM platforms.
- Designed and developed an Android kiosk application integrated with weighing machines and real-time gold-rate APIs, enabling instant customer valuation services at branches.

Experience

- Developed branch monitoring software with AI-powered audio transcription capabilities using OpenAI Whisper APIs, integrated into the company's IAM platform.
- Built an AI-driven voicebot leveraging OpenAI APIs (Whisper, Text-to-Speech, and Conversational AI) to improve customer engagement and support automation.
- Modernized the company's existing chatbot into an advanced AI-powered assistant deployed on the corporate website.
- Developed and maintained full-stack PHP/Laravel applications for internal operations and process automation.
- Implemented payment gateway integrations and secure transaction processing workflows.
- Developed Hashchain-based ledger management solutions to improve transaction traceability and auditing.
- Managed deployment pipelines, server administration, and application hosting across AWS-managed and dedicated infrastructure environments.
- Contributed to research and development initiatives involving AI, automation, computer vision, and process optimization.

Technologies: PHP, Laravel, Python, MySQL, Flutter, Android, OpenAI APIs, AWS, Hashchain, Razorpay, REST APIs, Linux, Git

➤ **Freelance PHP Web Developer [June 2023 - January 2025] / Software Consultant- Full Stack PHP Web Developer (Internal Software Development and Website+SEO)**

- Delivered custom web applications, automation platforms, dashboards, and Android solutions for clients across hospitality, construction, and travel industries.
- Managed Linux servers, Cloudflare infrastructure, DNS, SSL/TLS, hosting, and deployment environments.
- Led SEO, website optimization, and digital presence improvements.
- Integrated payment gateways, Maps APIs, social media platforms, Google Reviews, and third-party business systems.
- Reduced client operational costs through open-source, self-hosted, and custom-built software solutions.

Clients: RiLum Homestay, Dream Trip Planner, Trusteroo Incorporation, SME Constructions, Lehkai Housie.

Technologies: PHP, MySQL, Android (Kotlin), REST APIs, Linux Administration, Web Hosting Management, Server Management, SEO Optimization, Cloudflare (DNS, SSL/TLS, CDN & Security), ElfSight Integrations, Google Maps API, JavaScript, HTML5, CSS3, Bootstrap, Git, Email Server Configuration, Third-Party API Integrations, Website Deployment & Maintenance.

➤ **Trinity Mobility Pvt Ltd / Associate Software Engineer - Full Stack Java Web Developer (Identity Access Management/Security)**

September 2022 - July 2023, Bengaluru, Karnataka. Onsite.

- Developed and customized Identity and Access Management (IAM) solutions for enterprise and government projects, including Cairo Smart City, KSDMA (Kerala EWDS), Chennai Port Authority, and Karimnagar Smart City.
- Customized WSO2 Identity Server and API Manager platforms.
- Implemented OAuth2, SAML, Federated Authentication, Social Login, and 2FA integrations.
- Built custom authenticators and login workflows using Java, Spring, and WSO2.
- Developed APIs and managed API publishing through WSO2 API Manager.
- Managed MSSQL integrations, Linux deployments, and CI/CD processes.
- Reduced licensing costs through in-house IAM customizations and authentication modules.

Technologies: WSO2 Identity Server, WSO2 API Manager, Java, Spring Framework, Spring Security, OAuth 2.0, SAML, Federated Authentication, JSP, HTML, CSS, JavaScript, Angular, MSSQL Server, Linux, Windows Server, REST APIs, Maven, Tortoise SVN, Jenkins, Jira, CI/CD, Authentication & Authorization, Identity Management.

Education

Miskolci Egyetem / Master of Science in Informatics

July 2022, Miskolc, Hungary. Medallion of Merit(Bronze).

Machine Learning and Networks.

Visvesvaraya Technological University / Bachelor of Engineering in Computer Science and Engineering

September 2017, City Engineering College, Bengaluru

Skills

Languages: PHP, Python, Java, Kotlin, JavaScript, SQL

Frameworks & Platforms: Laravel, Spring Boot, Spring Security, MERN Stack, Flutter, WSO2 Identity Server, WSO2 API Manager

AI & Machine Learning: OpenAI APIs, Whisper, TTS, OpenCV, Computer Vision, Deep Learning

Cloud & DevOps: AWS, Linux, Jenkins, Git, SVN, HashiCorp Vault, CI/CD

Security & IAM: OAuth2, SAML, MFA, SSO, Federated Authentication, Identity & Access Management

Databases: MySQL, MSSQL Server

Infrastructure: Cloudflare, DNS, SSL/TLS, Web Hosting, Server Management

Tools: Postman, VS Code, Eclipse, Jira, Maven

Awards

- Won Second Place at the ICCSTAR-2017 Conference held at City Engineering College for presenting our project Smart Reflect - Raspberry Pi-based Smart Mirror interface using REST API.
- Awarded the Bronze Medallion of Merit for excellent academic performance at Miskolci Egyetem.

Languages

Proficient: English, Kannada, Hindi

Beginner: Telugu, Tamil

Certifications

- NVIDIA Omniverse & OpenUSD Certifications (2025)
- Ethical Hacking - Mobile Platforms and Network Architecture, Become an Ethical Hacker, Introduction to Malware, Introduction to Ethical Hacking with bWAPP and Kali from Great Learning
- Type Dojo- Fast Typing Speed: Technical 67WPM with 97% accuracy.
- Bitcoin and Cryptocurrency Technologies - Princeton University on Coursera with 91.66% in Programming Assessments based on JAVA.
- Bolt IoT Platform Training
- Advanced Cyber Security - Threats and Governance from Great Learning.
- Cyber Forensics, Encryption, Cyber Security Threats, and Firewall from Great Learning
- Ethical Hacking - Mobile Platforms and Network Architecture, Become an Ethical Hacker, Introduction to Malware, Introduction to Ethical Hacking with bWAPP and Kali from Great Learning

GRE[2020]:315; IELTS:7.5 [R:7.5 W:6 L:9 S:6.5]

Projects

Implementation of Deep-Learning / Machine-Learning-based algorithms in analyzing and detecting DDoS attacks.

July 2022, Miskolc, Hungary.

Leach-based WSN protocol in OMNET++ in a cluster topology, and using TDMA to schedule transmissions.

March 2021, Miskolc, Hungary.

Smart Reflect - Raspberry Pi-based Smart Mirror using REST API.

September 2017, City Engineering College, Bengaluru.

DECLARATION:

I hereby state that the information provided above is true to my knowledge.

Vinay Karthik M B
